

BRING CHEMICAL DOSING TO THE JOB

CHEMICAL CUBE PORTABLE CHEMICAL METERING SYSTEM

For disinfection and dechlorination jobs across different sites, Chemical Cube keeps metering equipment together in one compact, portable system.

WHERE IT FITS

Watermain Disinfection

Chemical dosing for watermain disinfection and superchlorination work.

Dechlorination

Chemical feed for applications requiring chlorine removal.

Water & Wastewater Treatment

Chemical dosing for water disinfection and lagoon phosphorus treatment.

Product Details

Matched to Your Process. Built to Move.

Effective chemical dosing starts with the right setup. SCG Process helps match your metering system to your chemical, target dose, water flow and operating pressure.

Move With the Work

Keep metering equipment together in a compact frame for transport between work locations.

Connect & Disconnect

Quick-disconnect connections support setup and removal between treatment tasks.

Configure for Your Application

Discuss flowmeter, wheel and stand options with your SCG representative.

LET'S DEFINE YOUR DOSING REQUIREMENTS

Share your treatment requirements with SCG Process to identify the equipment, configuration and connections your job needs.
